

HIGH FLOW AIR GUN WITH OPTIONAL NOZZLES AND EXTENTION

APPLICATION

- Used widely for Blow-off of dirt, dust, oil etc from shop floor, machine working area, deep holes, crevices, geometric patterns, etc. & any hard to reach places.
- Better operator control because of push button operation. Increasing safety & reducing compressed air wastage.

SPECIAL FEATURES

- These high flow blow guns when coupled with different nozzles & extentions, can be a very powerful tool for all types of blow off applications.
- Air saving nozzles / High force nozzles with extentions can be used in case of hard to reach places. Standard extentions up to 1 Mtr. long available with us. Longer extentions can be customised as per requirement.

CONSTRUCTION

- These Blowguns are made of Cast Zinc, thus making them rugged & built to last.
- Ergonomic handle & trigger design. Even continuous operation does not cause any fatigue to the operator.
- Nitrile Rubber Grip is provided to ensure operator's comfort & avoid slippage.
